ARSEMA NEGASH

Software Engineering Student | Aspiring AI & Cloud Engineer

Addis Ababa, Ethiopia | 0911754901 | negarse63@gmail.com
github.com/Arsema-Negash | LinkedIn Profile

Professional Profile

Third-year Software Engineering student at Addis Ababa Science and Technology University with a strong interest in building practical software and intelligent systems. Developing skills in machine learning, applied AI, data engineering, and cloud technologies through coursework and hands-on projects. Interested in opportunities to learn, collaborate, and contribute to real-world engineering work.

Education

BSc in Software Engineering — Addis Ababa Science and Technology University (AASTU)
2024 – Present

Technical Skills

Programming	Python, C++, JavaScript, SQL
AI & Data	Scikit-learn, PyTorch, Pandas, NumPy; introductory machine learning and data analysis
Big Data	Apache Spark, PySpark, Kafka, HDFS
Tools	Git, GitHub, Docker, VS Code; basic Linux

Selected Projects

CAAFI_AI — AI Health Information Prototype

Developing a health-information assistant concept focused on making guideline-based information more accessible. The project explores retrieval from Ethiopian primary-care clinical guidance and a voice-oriented user experience.

Spam Detector

Built a machine-learning pipeline to classify spam and identify common social-engineering patterns such as urgency, financial lures, authority cues, and phishing. Project work includes model training and a web application interface.

Card Fraud Detection

Worked on a credit-card fraud detection project using an imbalanced dataset, exploring class-imbalance handling approaches and model-based detection.

Areas of Interest

Applied AI and machine learning, deep learning, software engineering, data engineering, cloud computing, and distributed systems.

Additional Learning

Continuously building practical knowledge in AI engineering, machine learning, big data technologies, cloud fundamentals, and DevOps practices.
